Continuation Sheet (PTOL-303)

Application No.

Continuation of 3. NOTE: a) The claims have been amended so the scope of the invention is changed. The claims encompass new limitations, which would raise potential new grounds of rejection, so further search and/or consideration is required. b) proposed amended claim 6 may overcome the prior art rejection but it would raise an issue of new matter because the spec does not teach an ankyrin binding domain that does not contain transmembrane and extracellular domains of the L1-CAM family. In addition, proposed claim 19 would raise an issue of lack of written description and proposed claim 22 would also raise an issue of 112-2nd because the claim would be broader than claim 6. Thus, the amendment does not simplify the issues of the rejections and further does not place the application in better condition for appeal or allowance.

However, proposed amended claims 7, 20, and 24 would be allowable, and proposed amended claim 23 would be objected to because the claim depends on rejected claim 6.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments have been fully considered but they are insufficient to overcome the rejection under 112-1st, lack of scope of enablement and the rejections under 102(b) & 103(a). The rejections are maintained for the reasons made of record in the office action mailed 6/23/09 as directed to the previously presented claim limitations. Applicant's amendment filed on 12/18/09 has not been entered. Thus, the arguments directed to claim amendments not entered are currently moot.
